

Key Features&Benefits

- **Low Power Consumption**
- **High Precision**
- **High Sensitivity**
- **Wide Linear Range**
- **Excellent Repeatability and Stability**

Applications

Industrial Safety、 Mining、 Residential Safety、 Emissions、 Environmental Monitoring

Technical Specifications

MEASUREMENT

Operating Principle	3-electrodes electrochemical
Detection Range	0 to 5ppm
Maximum Overload	50ppm
Sensitivity	1.2 ± 0.3 (uA/ppm)
Baseline Offset(20℃)	-0.2 to +0.2ppm equivalent
Baseline Drift(-20~40℃)	<0.2ppm equivalent
Response Time (T90)	≤80 seconds
Repeatability	2% of signal
Linearity	Linear
Long Term Output Drift	<1% signal/month

ELECTRICAL

Recommended Load Resistor	10Ω
Bias Potential	not required

ENVIRONMENTAL

Temperature Range	-20℃ to 50℃
Operating Humidity	15 to 90%RH (non-condensing)
Pressure Range	90 to 110kPa
Storage Temperature	0℃ to 20℃

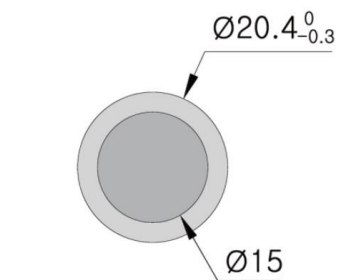

LIFETIME

Storage Life	6 months in sealed container
Expected Operating Life	3 years in air
Warranty	18 months from date of despatch

PHYSICAL CHARACTERISTICS

Weight	8g(approx)
Orientation Sensitivity	None

Product Dimensions

Note1: All performance specifications are based upon the following environment conditions: 20℃, 50% relative humidity and 1 atm (1013 mBar or ambient pressure).

Note2: PCB sockets are recommended for the sensor pin connection. Soldering to the sensor should be avoided.

Cross-sensitivity Data (20°C)

- Notes:**
1. Calibration with cross sensitivity gas is not recommended.
 2. The cross sensitivity may fluctuate between +/- 30% and may differ from batch to batch or from sensor's life time.
 3. The cross sensitivities are including but not limited to the above gases. It may also respond to other gases.

Gas	Concentration used (ppm)	DH4-HCHO-5(ppm HCHO)
CO	500	100

Precautions

1. The sensor should be prevented from organic solvents and corrosive gases.
2. The sensor should not be stored in dusty, dirty areas and anaerobic environment.
3. The sensor must not be exposed to very high concentrations of the analyte permanently.
4. Excessive shock or vibration should be prevented to avoid internal damages.
5. The pins should not be broken and bent.
6. Electrolyte leakage can cause damage, please do not disassemble the sensor.
7. The working and reference electrodes should be in short-circuit condition in storage.
